campwarner.com: sample audit

Sample run on a public website · Checked Oct 17, 2026 (PT) · Not a client

CHECKED SCORE	NOT CHECKED	TOP PRIORITY
25/55	45 pts	3 fixes
45% of the points we could verify	Need a live AI or Google session	About 2 to 3 hours of work, plus Google verification

Score by category (100 points)

CATEGORY	SCORE	STATUS	WHAT WE FOUND
ChatGPT recommendation check	-/8	Not checked	Not checked. Requires running prompts in ChatGPT, which can't be done by fetching a web page. Run the prompts in Appendix A.
Gemini / Google AI Overview check	-/8	Not checked	Not checked. Same reason. Run the Appendix A prompts in Gemini and Google Search (AI Mode / Overviews).
Perplexity check	-/9	Not checked	Not checked. Run the Appendix A prompts in Perplexity and record which sources it cites.
Google Business Profile completeness	-/20	Not checked	Not checked. A GBP listing can't be verified from a page fetch, and no Google Maps link was found on the site. Confirm the profile exists, then score it with the GBP checklist.
Reviews (volume, recency, replies)	3/15	Needs work	Hipcamp listing (linked from the site) shows a “First Hipcamper Club” badge and no visible review count. The host joined May 2026. Google reviews: not checked.

Citations & NAP consistency	4/10	Needs work	1 citation verified (Hipcamp, linked via sameAs). Inconsistency: Hipcamp lists “No toilet”, but its own description mentions an outhouse. No phone number on the site, so NAP can't be fully matched. Other directories: not checked.
Website: crawlability & on-page	11/15	Pass	All 6 sitemap URLs return 200. robots.txt allows all and lists the sitemap. Every page has a unique title, a meta description, one H1 and a canonical tag. www redirects to the apex domain (301). Gaps: 3 images per page have empty alt text, there's no tel: link or phone number, and /llms.txt is 404 (optional). http:// didn't respond within 10s, so this needs a recheck.
Structured data (schema.org)	7/15	Needs work	A Campground JSON-LD block is on every page, with name, description, URL, sameAs, locality/region and 3 amenities. Missing: telephone, geo, image, priceRange, openingHours/checkin info, full amenity list (Hipcamp lists about 10), FAQPage, and an Organization/WebSite entity.

Fix list, in order

PRIORITY	FIX	AREA	POINTS	TIME
P1	Claim/verify Google Business Profile (category Campground), add photos, hours, booking link, Q&A	GBP	+ up to 20	1–2 h + verification wait
P1	Add phone number + tel: link site-wide; match it exactly on GBP and Hipcamp	Citations/Site	+3	15 min
P1	Expand Campground JSON-LD: telephone, geo, image, priceRange, full amenityFeature list, publicAccess, petsAllowed (see Appendix B)	Schema	+5	30 min
P2	Review engine: ask every guest for a Google + Hipcamp review 1 day after checkout, reply to every review	Reviews	+6–10	setup 1 h

P2	Fix Hipcamp listing contradiction (outhouse vs “No toilet”) so AI answers don't conflict	Citations	+1	10 min
P2	Add FAQPage (water, toilets, RVs, pets, 4WD, distance to JTNP) on /plan-your-stay/ + schema	Schema/AI	+3	1 h
P3	Descriptive alt text on the 3 empty-alt images per page	Site	+1	20 min
P3	List on 3–5 relevant directories (Yelp, Apple Business Connect, Bing Places, camping directories) with identical NAP	Citations	+3	2 h
P3	Run the Appendix A prompts monthly and track mention/rank/cited sources	AI	measurement	30 min/mo

How this sample was made: a live web fetch of campwarner.com (6 pages from its sitemap, robots.txt, sitemap.xml, llms.txt and its schema code) and its linked Hipcamp listing, on Oct 17, 2026 (PT). Anything marked “Not checked” was not verified, and no score is assumed for it. campwarner.com is not a client.
