n8n automations that keep running. If one breaks, you hear about it first.

For owners and small teams who use n8n to move data between apps. One workflow from $495, built in your n8n.

01

We scope the job

Where the data comes from, where it goes, how much there is, and what should happen when something fails.

02

We build it in your n8n

It pages through every result, retries when an app is busy, never writes duplicates, and sends an alert if a step fails. Settings live in one place.

03

We test it and hand it over

We run test data through every path, including failures. You get a plain-English guide, a recorded walkthrough and 14 days of fixes.

What you get

- ✓ **The workflow file.** Ready to import, and checked for broken links between steps.
- ✓ **Every page of results.** Many builds only grab the first page. Ours get all of it, with limits so a run can't go forever.
- ✓ **Retries when an app is busy.** If an app says “too many requests” or goes down for a moment, it waits and tries again, up to 5 times.
- ✓ **No duplicate rows.** Run it twice and nothing doubles. It only writes rows that are new or changed.
- ✓ **Failure alerts.** An email or Slack message that names the step that failed and why.
- ✓ **Tests for every path.** Sample data for the normal run and for failures, plus tests for any custom code.
- ✓ **A plain-English guide.** Setup, settings, what to watch, and how to fix common problems.

Price

$495 and up, per workflow

Fixed price after a 30-minute scoping call.

Single workflow · one source to one destination	**from $495**
Multi-step system · several apps	**Quote**
Care · monitoring + fixes	**$249/mo**

Runs in your own n8n, cloud or self-hosted. Your logins and data stay in your account.
